Functional Specification

Super Admin Portal — Business & Operations

Version 1.1 | **Date** May 31, 2026 | **Confidential**

© 2026 GlowTap

1. Executive Summary

The **GlowTap Super Admin Portal** is the centralized command center for managing the entire GlowTap platform. It enables the GlowTap backend and operations team to onboard salons, approve branches, manage subscriptions and billing, monitor transactions, control user access, publish content, analyze platform health, and resolve support issues — all from a single secure interface.

GlowTap follows an **Organization → Branch** model: a salon owner creates an **Organization (Org)** when subscribing. Each org can operate **multiple branches** (physical locations). Branch creation is initiated by the salon admin but requires **Super Admin approval** before going live.

2. User Roles & Access

Role	Description
Super Admin	Full platform access. Manages salons, subscriptions, content, reports, and support.
Super Admin (Read-only)	View-only access for audit, finance, or compliance teams.
Operations Agent	Limited access to approvals, support tickets, and defaulter reports.

> Super Admin login is secured with email/password, optional MFA, and session timeout policies.

3. Platform Navigation Overview

```
Dashboard
├── Salon Approvals          (new subscription leads)
├── Branch Approvals         (new branch requests from onboarded salons)
├── All Salons               (active, suspended, terminated)
├── Transactions             (end-user payments to salons)
├── Subscription Management  (plans, discounts, salon billing)
├── Reports                  (defaulters, revenue, growth)
├── User Access Control      (Salon Admins, Sub Admins, End Users)
├── CMS & Banners            (website content, in-app promotional banners)
├── Platform Analytics       (KPIs, trends, usage)
├── Support & Ticketing      (platform and salon-raised tickets)
├── Master Configuration     (reason codes, notifications, tax settings)
└── Audit Log                (who did what, when)
```

4. Module Specifications

4.1 Dashboard (Home)

The landing page provides an at-a-glance view of platform health:

- **Pending actions:** Salon approvals, branch approvals, open tickets, defaulter count
- **Key metrics:** Total active salons, total branches, MRR (Monthly Recurring Revenue), active end users, today's transaction volume
- **Alerts:** Failed payments, salons nearing subscription expiry, high-priority tickets
- **Quick actions:** Approve salon, view defaulter report, create ticket

---

4.2 Salon Approvals

Trigger: When a salon owner completes the subscription purchase/sign-up flow on GlowTap, a **lead** is automatically created and appears in the Salon Approvals tab.

Workflow:

1. Lead appears with status **Pending Review**
2. Super Admin reviews salon details: business name, owner name, email, phone, address, selected subscription plan, payment status, uploaded documents (if KYC enabled)
3. Super Admin sets **Commission Percentage** — the rate GlowTap earns on each end-user payment to this salon (e.g., 5%, 8%, 10%). Default can be pre-filled from platform config; editable per salon at approval.
4. Super Admin can:
    - **Approve** → Salon is onboarded; a Salon Admin account is auto-created and credentials are emailed to the registered email
    - **Reject** → Reason selected from configured list; notification sent to applicant
    - **Request More Info** → Status changes to Awaiting Documents; applicant is notified

Post-Approval Actions (automatic):

- Organization record created with **commission percentage** saved
- First branch (primary location) created and activated
- Salon Admin account created with full branch access
- Welcome email with login credentials sent
- Subscription activated per selected plan

Filters: Status (Pending, Approved, Rejected, Awaiting Info), date range, subscription plan, city/region

---

4.3 Branch Approvals

Context: After onboarding, a Salon Admin can request to open additional branches under their organization. Each new branch requires Super Admin approval.

Workflow:

1. Salon Admin submits branch request from their portal (branch name, address, contact, operating hours)
2. Request appears in Branch Approvals with linked org/salon name
3. System validates: **Does the salon's current subscription allow another branch?**
   - If **within limit** → Proceed to review
   - If **at limit** → Request flagged as "Upgrade Required"; Super Admin can approve with plan upgrade or reject with upgrade prompt sent to salon
4. Super Admin reviews and **Approves** or **Rejects** (with reason)
5. On approval, branch becomes active and visible in the salon's admin portal

Branch Limit by Subscription Plan (example tiers):

Plan	Max Branches	Notes
Starter (1M)	1	Single location only
Growth (6M)	3	Small multi-location
Professional (12M)	10	Mid-size chains
Enterprise (24M)	Unlimited	Custom pricing

> Plan-branch limits are configurable in Subscription Management. Existing salons are grandfathered or prompted to upgrade when limits change.

4.4 All Salons

Central registry of all onboarded salons (organizations).

List View:

- Salon name, city, status, plan, branch count, commission %, total earnings (subscription + commission)

Detail View — Profile & Settings:

- Business profile: name, logo, contact, GST/tax ID, registered address
- Owner details

- Current subscription: plan name, start date, renewal date, billing cycle, payment method
- **Commission settings:** current commission percentage (editable)
- Branch list with status per branch
- Account status: Active, Suspended, Terminated

Detail View — Earnings Summary

A dedicated earnings panel showing GlowTap revenue from this salon to date, split by source:

Earnings Type	Description	Example Metrics
Subscription Revenue	Salon → GlowTap subscription payments (plan purchase, renewals, upgrades)	Total paid, outstanding, last payment date, MRR contribution
Commission Revenue	GlowTap share on end-user → salon transactions	Total commission earned, transaction count, avg commission per txn, current rate %

Earnings Breakdown (till date):

- **Total GlowTap Earnings** = Subscription Revenue + Commission Revenue
- **Subscription:** itemized list of invoices/payments (date, type, amount)
- **Commission:** itemized list per transaction (date, end-user txn amount, commission %, commission amount)
- Date range filter (7D, 30D, 90D, custom, all-time)
- Export earnings report (CSV/PDF)

Commission Percentage — Edit:

- Editable from salon detail view at any time
- Valid range: configurable platform min/max (e.g., 1%–25%)
- Change takes effect on **next transaction** (not retroactive)
- Requires confirmation; previous rate and new rate logged in audit trail
- Optional effective date for scheduled rate changes

Actions:

Action	Description	Reason Required
Suspend	Temporarily disables salon access. End users cannot book; admin portal locked.	Yes — from configured reason codes
Resume	Restores suspended salon to active status.	Optional note
Terminate	Permanent closure. Data retained per retention policy; no reactivation without re-onboarding.	Yes — from configured reason codes

Reason Codes:

- Each suspend/terminate reason is pre-configured in the database
- Each reason code may be associated with a **pricing impact** (e.g., early termination fee, forfeiture of discount)
- Reason and pricing are displayed before confirmation

Manual Subscription Updates:

- Change subscription plan (upgrade/downgrade)
- Extend validity manually (goodwill gesture, dispute resolution)
- Apply **discount component**:
  - **RC (Recurring Charge discount)** — reduces ongoing monthly/recurring fee from next bill date
  - **NRC (Non-Recurring Charge discount)** — one-time credit on next invoice
- Discount has: amount/percentage, description, effective date, expiry (optional)

Filters: Status, plan, city, branch count, subscription expiry window, payment status

---

4.5 Transactions History

Records all **end-user payments made to salons** (appointment bookings, service payments, product purchases, etc.).

Displayed Fields:

- Transaction ID, date/time
- End user (masked ID/name)
- Salon & branch
- Service/product description
- **Gross amount** (paid by end user)
- **Commission %** and **Commission amount** (GlowTap share)
- **Net to salon** (gross − commission)
- Payment method, status (Success, Failed, Refunded, Disputed)
- Gateway reference ID

Filters:

- Date range
- Salon / branch
- Transaction status
- Payment method
- Amount range
- City/region

Actions:

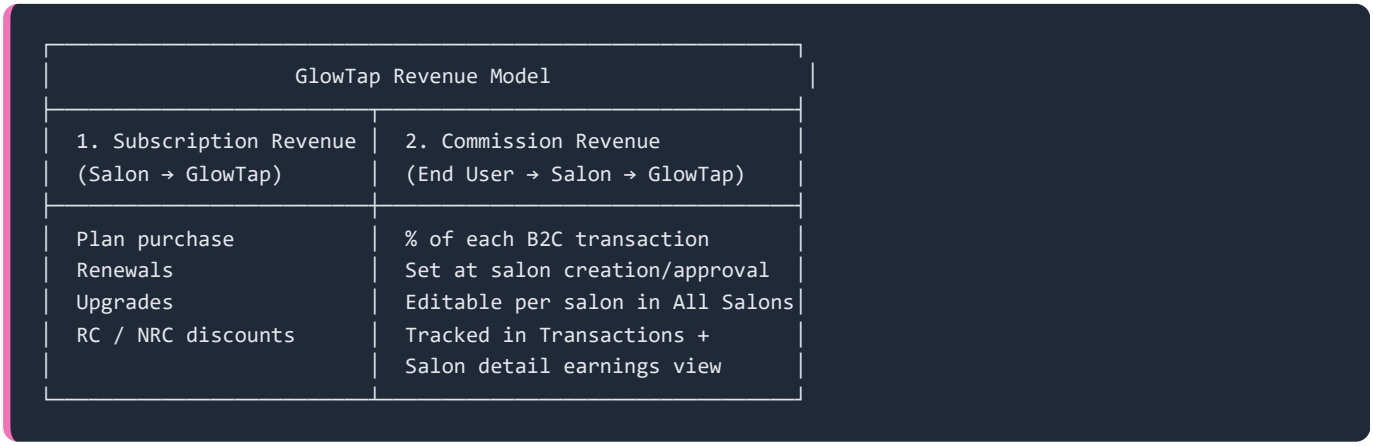

- View transaction detail
- Export to CSV/Excel
- Flag for dispute investigation (links to Support & Ticketing)

> This module tracks **B2C transactions** (end user → salon). Subscription payments (salon → GlowTap) are tracked under Subscription Management.

4.6 Subscription Management

4.6.0 GlowTap Earning Model (Overview)

GlowTap generates revenue through **two streams**:

- **Subscription:** Fixed/recurring fees based on plan tier and contract length
- **Commission:** Variable fee per end-user payment; percentage configured per salon
- Both streams visible in **All Salons → Detail → Earnings**, **Subscription Management**, **Platform Analytics**, and **Reports**

4.6.1 Plan Overview

Dashboard showing:

- Count of salons per subscription plan (1M, 6M, 12M, 24M, etc.)
- Revenue breakdown by plan
- Upcoming renewals (7/30/90 day windows)
- Churn risk indicators

4.6.2 Plan Configuration

Create / Edit Subscription Plans:

Field	Description
Plan name & code	e.g., "Growth 6M", `GROWTH_6M`
Duration	1, 6, 12, 24 months
Base price (NRC)	One-time or upfront component
Recurring price (RC)	Monthly recurring charge (if applicable)
Max branches	Branch limit for this plan
Feature entitlements	Appointments, manpower, services, analytics tier, etc.
Status	Active, Deprecated (no new sign-ups), Retired

Contract Discounts:

- Discounts tied to contract length (6M, 12M, 24M)
- Types: percentage off, fixed amount, free months
- **Display description** — marketing text shown to salon owners during purchase and in-app (e.g., "Save 20% with our 12-month plan")
- Validity period for promotional discounts

Plan Change Rules:

- Upgrade: immediate effect, prorated billing
- Downgrade: effective at next renewal; branch count must fit new plan limit

4.6.3 Subscription Transactions

Tracks **salon → GlowTap** payments:

- Subscription purchase, renewal, upgrade charges
- Refunds and credits applied
- Invoice history per salon
- Failed payment attempts and retry status

Filters: Salon, plan, date range, payment status, invoice number

4.6.4 Commission Configuration (Platform Defaults)

Master settings for commission model (in Master Configuration):

- Default commission % for new salons
- Min / max allowed commission range
- Whether commission applies to refunds (pro-rata reversal)
- Commission settlement cycle (real-time ledger vs periodic payout report)

4.7 Reports

4.7.1 Daily Defaulter Report (Primary)

Purpose: Replace automatic salon suspension for non-payment. Instead, generate a daily report so the backend team can proactively call salons before taking action.

Report Contents:

- Salon name, owner contact, email, phone
- Outstanding amount and days overdue
- Last payment date
- Current plan and renewal date
- Branch count
- Previous contact attempts (if logged)
- Recommended action (Call, Send Reminder, Suspend Warning)

Delivery: Generated daily at configured time; available in portal and optionally emailed to operations distribution list.

Follow-up Actions (manual):

- Log call outcome
- Extend grace period
- Apply discount
- Initiate suspension (manual, with reason)

© 2026 GlowTap

4.7.2 Additional Reports

Report	Description
Revenue Summary	MRR, ARR, subscription revenue, **commission revenue**, combined platform revenue
Commission Report	Commission earned by salon, by city, by period; avg rate, top earners
Salon Growth	New onboardings, approvals pending, rejection rate
Branch Activity	Branch additions, approvals pending, utilization by plan
Transaction Volume	End-user transaction trends by salon, city, service category
Churn & Retention	Salons that did not renew, downgrade patterns
Support SLA	Ticket volume, resolution time, open backlog by priority
Discount Utilization	RC/NRC discounts applied, revenue impact
Plan Distribution	Salons by plan tier, upgrade/downgrade funnel
Geographic Performance	Salons and revenue by city/region

All reports support date range selection and CSV/Excel export.

4.8 User Access Control

Three tabs for viewing and limited management of platform users.

4.8.1 Salon Admins

- **Creation:** Auto-generated on salon approval with access to all branches under the org
- **Portal Use:** View profile, login history, branch access, status
- **Manual Edit:** Update email, reset password, modify contact (with audit log)
- **Disable:** Block login for fraud or policy violation (does not delete data)

4.8.2 Sub Admins

- **Creation:** Done by Salon Admin from their portal (not manually creatable by Super Admin)
- **Portal Use:** View-only for Super Admin — see which sub-admin has access to which branches and modules (appointments, manpower, services)
- **Edit Restriction:** Super Admin **cannot** modify branch/module permissions (salon admin owns this)
- **Disable Only:** Super Admin can disable a sub-admin ID if fraudulent or illegal activity is detected
- **Audit:** All disable actions logged with reason

© 2026 GlowTap

Confidential

4.8.3 End Users

- **Portal Use:** View end-user profiles linked to bookings and transactions
- **Disable Only:** Block account for abuse, fraud, or policy violations
- **No manual creation** — end users self-register via the consumer app

Common Features Across Tabs:

- Search by name, email, phone, salon
- Filter by status (Active, Disabled)
- View activity summary (last login, transaction count)
- Export user list

4.9 CMS & Banner Management

4.9.1 Website Content (CMS)

Manage public-facing website content:

- Pages: About, Pricing, Features, FAQ, Terms, Privacy Policy
- Blog/news posts
- Media library (images, videos)
- SEO metadata (title, description)
- Publish / draft / schedule workflow
- Preview before publish

4.9.2 In-App Banners

Promotional banners shown to salon admins inside the GlowTap salon app/portal.

Banner Configuration:

- Title, image, CTA text, CTA link (e.g., upgrade plan page)
- Target audience (logic-driven):
  - Current plan (e.g., show 12M discount banner to 1M subscribers)
  - Subscription expiry window (e.g., 30 days before renewal)
  - Renewal behavior (e.g., "Renew 12M plan → get 1 extra month free"; "Renew 24M → get 2 extra months")
  - Branch utilization (e.g., "You've reached your branch limit — upgrade to add more")
  - New feature announcements
- Display priority and rotation order
- Active date range
- A/B test variant (optional, future)

© 2026 GlowTap

Example Logic Rules:

Condition	Banner Message
Plan = 1M, tenure > 3 months	"Upgrade to 12M and save 20%"
Plan = 12M, expiry within 30 days	"Renew 12M now and get 1 month free"
Plan = 12M, expiry within 30 days, offer 24M	"Switch to 24M renewal and get 2 months free"
Branch count = plan max	"Add more locations — upgrade your plan"

4.10 Platform Analytics

Visual dashboards for strategic insight:

- **Salon Metrics:** Active salons, new sign-ups, churn rate, avg branches per salon
- **Revenue Metrics:** MRR, ARR, ARPU, **subscription revenue**, **commission revenue**, combined LTV
- **Usage Metrics:** Appointments booked, active end users, transaction GMV
- **Geographic Heatmap:** Salon density and revenue by region
- **Funnel Analytics:** Lead → approval → active → renewal conversion
- **Feature Adoption:** Which modules (appointments, manpower, services) are most used
- **Time-series Charts:** Daily/weekly/monthly trends with comparison periods

Filters: date range, plan tier, region, salon segment.

4.11 Support & Ticketing

Central helpdesk for platform-level and salon-raised issues.

Ticket Creation:

- Select **Reason** (from configured master list)
- Select **Sub-Reason** (dependent on reason)
- Description (free text)
- Attach files (screenshots, documents)
- Link to salon/branch/user (optional)
- Priority: Low, Medium, High, Critical

Ticket Sources:

- Created by Super Admin/Ops team
- Escalated from salon admin portal

- Auto-created from failed payments, approval bottlenecks (configurable)

Ticket Status Flow:

```
Created → In Progress → On Hold → Awaiting User Confirmation → Resolved
                ↑              ↓
                └──────────────┘
```

Status	Meaning
Created	New ticket, not yet assigned
In Progress	Assigned agent working on it
On Hold	Waiting on internal dependency
Awaiting User Confirmation	Solution proposed; waiting for salon/user response
Resolved	Closed with resolution notes

Features:

- Assign to team member
- Internal notes (not visible to salon)
- SLA timers based on priority
- Ticket history and audit trail
- Reopen resolved tickets
- Dashboard: open count, avg resolution time, overdue tickets

---

4.12 Master Configuration

Centralized settings managed by Super Admin:

- **Reason Codes:** Suspend, terminate, reject, ticket reasons and sub-reasons
- **Pricing Rules:** Reason code → fee/penalty mapping
- **Notification Templates:** Email/SMS templates for onboarding, renewal, suspension, etc.
- **Tax/GST Settings:** Rates by region
- **Grace Period:** Days before a salon appears on defaulter report
- **Feature Entitlements Matrix:** Which features each plan includes
- **Payment Gateway Settings:** Active gateways, retry rules

© 2026 GlowTap

Confidential

4.13 Audit Log

Immutable log of all Super Admin actions:

- Who performed the action
- What was changed (before/after values)
- When (timestamp)
- IP address and session ID

Tracked Actions: Approvals, suspensions, plan changes, discount applications, user disables, configuration changes, ticket updates.

Retention: configurable (recommended minimum 2 years).

---

5. Key Business Rules

5.1 Subscription & Branch Limits

- Each subscription plan defines a **maximum number of branches**
- Salon cannot activate a branch beyond their plan limit without upgrading
- Downgrading a plan requires branch count to be at or below the new plan's limit
- Super Admin can override limits case-by-case with audit trail

5.2 Non-Payment Handling

- **No automatic suspension** for payment defaults
- Daily defaulter report drives manual outreach
- Super Admin decides: grace extension, discount, reminder, or suspension
- Suspension for non-payment uses configured reason code with associated pricing impact

5.3 Discount Application

- RC discounts apply to recurring charges from the **next bill date**
- NRC discounts apply as a one-time credit on the **next invoice**
- Discounts require description for salon visibility on invoice/portal
- All discounts logged with approver identity

5.5 Commission Rules

- Commission percentage is set at **salon approval** and stored on the organization record
- Super Admin can **edit commission %** anytime from All Salons detail view

© 2026 GlowTap

- Commission is calculated on **successful** end-user transactions: `commission_amount = gross_amount × (commission_pct / 100)`
- Rate changes apply to **future transactions only**; historical transactions retain original rate
- On refund, commission is reversed proportionally
- Commission earnings roll up into salon detail **Earnings Summary** and platform-wide reports

6. Notifications & Communications

Event	Recipient	Channel
Salon approved	Salon owner	Email
Salon rejected	Applicant	Email
Branch approved/rejected	Salon admin	Email + in-app
Subscription renewal reminder	Salon admin	Email + in-app banner
Defaulter outreach	Salon admin	Email/SMS (manual trigger)
Account suspended/resumed	Salon admin	Email + in-app
Ticket status update	Ticket raiser	Email + in-app
Sub-admin disabled	Salon admin	Email

7. Additional Recommendations

The following capabilities are recommended to strengthen the platform:

1. **Document Verification (KYC)** — Collect and verify business registration, owner ID during salon approval
2. **Invoice Management** — Generate, view, and resend subscription invoices from Super Admin
3. **Refund Processing** — Initiate full/partial refunds on subscription or flagged B2C transactions
4. **Bulk Operations** — Bulk approve, bulk email, bulk plan migration for enterprise deals
5. **Communication Hub** — Send targeted announcements to salon segments (by plan, region, status)
6. **Dispute Management** — Track payment disputes from end users with resolution workflow
7. **Data Export & Compliance** — GDPR/data deletion requests, salon data export on termination
8. **Maintenance Mode** — Platform-wide or per-salon maintenance flag for upgrades
9. **Referral Program Management** — Track salon referral codes and rewards
10. **Integration Marketplace** — Manage third-party integrations (payment, SMS, accounting) enabled per plan

© 2026 GlowTap

Confidential

8. Glossary

Term	Definition
Org / Organization	A salon business entity on GlowTap; can have multiple branches
Branch	A physical salon location under an organization
Salon Admin	Primary administrator for an org; full branch access
Sub Admin	Delegated admin created by Salon Admin with limited branch/module access
End User	Consumer who books appointments and pays salons via the GlowTap app
Lead	A pending salon sign-up awaiting Super Admin approval
RC	Recurring Charge — ongoing subscription fee
NRC	Non-Recurring Charge — one-time fee or credit
Commission	GlowTap's percentage share on each end-user payment to a salon
GMV	Gross Merchandise Value — total end-user transaction volume
MRR	Monthly Recurring Revenue
Defaulter	Salon with overdue subscription payment beyond grace period

9. Document Control

Version	Date	Author	Changes
1.1	June 15, 2026	GlowTap Product Team	Commission earning model, salon earnings detail view
1.0	May 31, 2026	GlowTap Product Team	Initial release

This document describes the intended behavior of the GlowTap Super Admin Portal. Technical implementation details are covered in the companion Solutioning Document.
