GlowTap Salon Admin Portal

Figma Screen Inventory & Step-by-Step Design Guide

Version: 1.0
Date: July 24, 2026
Purpose: Screens to design in Figma for Salon Admin — **only what is defined in the Functional Specification v1.3**.

Source: Admin-Functional-Spec.md v1.3

---

1. Screen Count Summary

Counting rules:

- **Page** = navigable screen defined in the functional spec
- **Modal** = overlay for an action defined in the functional spec (not a page)
- **Layout** = app shell (design once, **not a page**)
- **Component** = reusable pattern (empty state, confirm dialog) — not counted as pages

Category	Pages	Modals	Layout	Figma Frames	Complexity
Auth	4	0	0	4	Low
App Shell	—	—	1	1	Medium
Dashboard	1	0	0	1	Medium
Organization Profile & Subscription	2	1	0	3	Medium
Branches	3	1	0	4	Medium
Sub Admins	2	2	0	4	Medium
Employees	3	2	0	5	Medium
Leave & Holidays	1	3	0	4	Medium
Attendance	1	2	0	3	Low
Services & Availability	4	0	0	4	High
Appointments & Bookings	3	3	0	6	High
Transactions	2	0	0	2	Low
Reports	2	0	0	2	Medium
Support & Ticketing	2	2	0	4	Medium
TOTAL (in scope)	**30**	**16**	**1**	**~47**	

Summary:

- **30 pages** (functional spec only)
- **16 modals**
- **1 app shell** (layout — not a page)
- **~47 Figma frames**

---

2. Excluded — Not in Functional Spec v1.3

Do **not** design these unless added to a future functional spec version:

Removed ID	Was	Why excluded
AUTH-MFA	MFA Verification page	Spec: MFA may be added in a future release — not in v1.0 scope (§4.1)
APT-WALK	Walk-in booking create	Spec: future release (§4.12.6)
ATT-BIO	Biometric / geo check-in	Spec: optional future enhancement — not in v1.0 (§4.9)
CMS / BNR	CMS pages or banner editor	Admin only **consumes** platform banners on dashboard; create/edit is Super Admin (§4.16)
NTF-01	Dedicated notifications center	Spec lists event channels only — no notifications list screen defined
GLB-02	Error / 404 page	Not in functional spec
GLB-M01	Generic Confirm Dialog	Reusable component only — not a separate deliverable

Role / state notes (not separate screens):

- **Sub Admin dashboard** = same **DASH-01**, scoped to assigned branches (no org subscription / Sub Admin quick actions)
- **Account disabled** = state on **AUTH-01** (clear message)
- **Org Suspended / Terminated** = shell lock / read-only state on **SHELL-01** (§2, §5.6)
- **Confirm / Mark In Progress / Mark Completed** booking actions = primary buttons + reusable confirm — not separate modals

---

3. Complexity Legend

Level	Meaning
Low	List or simple form
Medium	Filters, tabs, tables, multi-step actions
High	Calendars, availability logic, rich editors, many conditional states

---

4. Complete Screen Inventory (Functional Spec Only)

4.1 Auth (4 pages) + App Shell (1 layout)

ID	Screen Name	Type	Functional reference
AUTH-01	Login	Page	§4.1 — email/password; account disabled message
AUTH-02	Forgot Password	Page	§4.1 — enter registered email → send reset link
AUTH-03	Reset Password	Page	§4.1 — set new password from email link
AUTH-04	Change Password	Page	§4.1 — from profile/settings (logged-in)
SHELL-01	App Shell	Layout	§3 — nav modules + **branch selector** + header

SHELL-01 nav (Main Admin): Dashboard, Organization Profile, Branches, Sub Admins, Employees, Leave & Holidays, Attendance, Services, Appointments & Bookings, Transactions, Reports, Support & Ticketing.

SHELL-01 notes:

- Most operational modules require **active branch context** (branch switcher)
- Org-level modules (Organization Profile, Sub Admins, org-wide Reports, plan change) do **not** require branch context
- Sub Admin nav: hide Organization Profile + Sub Admins; show only assigned modules (§2.1)

4.2 Dashboard (1 page)

ID	Screen Name	Type	Functional reference
DASH-01	Dashboard Home	Page	§4.2 — branch cards, KPIs, alerts, quick actions, platform banners

DASH-01 must show:

- Branch cards/list (name, city, status, today's appointments, today's revenue)
- Branch selector (persists until changed)
- Org KPIs (appointments, revenue, active employees, upcoming renewals)
- Alerts (pending branch requests, expiry, failed renewal, open tickets, staff on leave)
- Quick actions (switch branch, appointments, add employee, create service, raise ticket)
- **Promotional / platform in-app banners** (upgrade, renewal, branch limit — Super Admin configured) (§4.16)

4.3 Organization Profile & Subscription (2 pages + 1 modal) — Main Admin only

ID	Screen Name	Type	Functional reference
PROF-01	Organization Profile	Page	§4.3.1–§4.3.4 — Details + Subscription + Invoices tabs
PROF-02	Change Plan	Page	§4.3.3 — available plans, rules, proration preview
PROF-M01	Confirm Plan Change Modal	Modal	§4.3.3 — confirm; payment if applicable; effective date

PROF-01 tabs (one page, three tab panels):

- **Details** — business name, logo, address, GST/tax ID, owner, contact; account status (Active / Suspended / Terminated — read-only)
- **Subscription** — current plan, entitlements, usage vs limits, payment method (masked)
- **Invoices** — invoice list, download PDF, RC/NRC discounts, failed payment + retry / ticket link

---

4.4 Branches (3 pages + 1 modal)

ID	Screen Name	Type	Functional reference
BRN-01	Branch List	Page	§4.5.1 — name, city, status, employee count, services count
BRN-02	Branch Profile	Page	§4.4 — details, operating hours, gallery, GPS, save
BRN-03	Request New Branch	Page	§4.5.2 — form; pending / rejected reason visibility
BRN-M01	Branch Limit — Upgrade Prompt Modal	Modal	§4.5.2 — at max branches → prompt upgrade before submit

---

4.5 Sub Admins (2 pages + 2 modals) — Main Admin only

ID	Screen Name	Type	Functional reference
SAD-01	Sub Admins List	Page	§4.6 — name, email, phone, status, branches, last login
SAD-02	Create / Edit Sub Admin	Page	§4.6 — branch multi-select + module permission toggles (§2.1)
SAD-M01	Disable / Enable Sub Admin Modal	Modal	§4.6 — disable blocks login; enable restores (unless Super Admin disabled)
SAD-M02	Reset Password Modal	Modal	§4.6 — triggers email to Sub Admin

SAD-02 module toggles: Branch Profile, Employees, Leave & Holidays, Attendance, Services, Appointments, Transactions, Reports.

4.6 Employees (3 pages + 2 modals)

ID	Screen Name	Type	Functional reference
EMP-01	Employee List	Page	§4.7.2 — search/filter by name, employee number, status
EMP-02	Employee Detail	Page	§4.7.2 — profile, specialists services, weekly off, leave & attendance summary
EMP-03	Add / Edit Employee	Page	§4.7.1 — name, phone, email, role, DOJ, photo; auto employee number
EMP-M01	Edit Weekly Off Modal	Modal	§4.7.3 — applies from **next calendar day**
EMP-M02	Deactivate Employee Modal	Modal	§4.7.4 — inactive; remove from future slots; retain history

> Requires **branch context**. Sub Admin needs Employees permission.

4.7 Leave & Holidays (1 page + 3 modals)

ID	Screen Name	Type	Functional reference
LVH-01	Leave & Holidays	Page	§4.8 — tabs: Employee Leave | Branch Holidays
LVH-M01	Apply Leave Modal	Modal	§4.8.1 — employee, type (Sick / Casual / Paid), date range, note
LVH-M02	Manage Leave Modal	Modal	§4.8.1 — edit, cancel, or override (with audit note)
LVH-M03	Add / Edit Holiday Modal	Modal	§4.8.2 — date, name, optional recurring annual; past holidays read-only

---

4.8 Attendance (1 page + 2 modals)

ID	Screen Name	Type	Functional reference
ATT-01	Attendance List	Page	§4.9 — employee, date, in/out, status (Present, Absent, Half-day, On Leave, Weekly Off)
ATT-M01	Mark In / Mark Out Modal	Modal	§4.9 — manual entry for a given date
ATT-M02	Edit Attendance Modal	Modal	§4.9 — edit current/past records (audit logged)

4.9 Services & Availability (4 pages) — HIGH COMPLEXITY

ID	Screen Name	Type	Functional reference
SVC-01	Service List	Page	§4.10.2 — filter status / specialist; sort name, price, popularity
SVC-02	Create / Edit Service	Page	§4.10.1 — name, description, price, duration, photo, offline pay, specialists, status
SVC-03	Slot Duration Configuration	Page	§4.11.1 — allowed granularities (e.g. 30 / 45 / 60 min)
SVC-04	Availability Preview	Page	§4.11.2 — preview calendar for service + date; No Specialist Available state

4.10 Appointments & Bookings (3 pages + 3 modals) — HIGH COMPLEXITY

ID	Screen Name	Type	Functional reference
APT-01	Appointments List & Calendar	Page	§4.12.1 — list + day/week/month calendar; branch/org filters
APT-02	Appointment Detail	Page	§4.12.2 — snapshot, payment breakdown, status/reschedule/refund history, actions
APT-03	Booking History	Page	§4.12.5 — org/branch filters, export, drill-down to APT-02
APT-M01	Reschedule Modal	Modal	§4.12.3 — pick available slot; prior slot freed
APT-M02	Cancel Booking Modal	Modal	§4.12.3–§4.12.4 — reason from master list; refund path if online paid
APT-M03	Initiate Refund Modal	Modal	§4.12.3–§4.12.4 — cancelled + online paid; status Initiated → Completed/Failed

APT-01 filters: date range, branch (org-wide), status, service, specialist, payment status, payment method.

APT-02 action bar (status-gated): Confirm, Reschedule, Cancel, Mark In Progress, Mark Completed, Mark No-Show, Initiate Refund — invalid transitions blocked by system (§5.4).

4.11 Transactions (2 pages)

ID	Screen Name	Type	Functional reference
TXN-01	Transaction List	Page	§4.13 — B2C payments; org or branch scope; export
TXN-02	Transaction Detail	Page	§4.13 — view detail; link to related appointment

> Subscription invoices (salon → GlowTap) live under **PROF-01 → Invoices**, not here.

4.12 Reports (2 pages)

ID	Screen Name	Type	Functional reference
RPT-01	Reports Index	Page	§4.14 — entry to org-level + branch-level reports
RPT-02	Report View (Template)	Page	§4.14.1–§4.14.2 — shared layout; date/branch filters; CSV/Excel export

8 organization-level reports on RPT-02 (Main Admin): Earnings Summary, Earnings by Branch, Earnings by Service, Earnings by Specialist, Appointment Summary, Payment Method Mix, Refund Report, Subscription & Utilization.

7 branch-level reports on RPT-02: Branch Daily Summary, Branch Earnings, Service Performance, Specialist Utilization, Leave & Attendance, Booking History Export, Peak Hours & No-Shows.

> Advanced analytics may be gated by subscription entitlements (§4.14).

4.13 Support & Ticketing (2 pages + 2 modals)

ID	Screen Name	Type	Functional reference
TKT-01	Tickets List	Page	§4.15 — status: Created, In Progress, On Hold, Awaiting User Confirmation, Resolved
TKT-02	Ticket Detail	Page	§4.15 — history, Super Admin replies (no internal notes), comments, attachments
TKT-M01	Create Ticket Modal	Modal	§4.15 — reason/sub-reason, description, attachments, optional links, priority suggestion
TKT-M02	Confirm Resolution Modal	Modal	§4.15 — when status is Awaiting User Confirmation; reopen within policy window

---

5. Suggested Figma Build Order

Design in this order so shared patterns land first:

1. **SHELL-01** + tokens (branch selector is critical)
2. **AUTH-01** → **AUTH-04**
3. **DASH-01** (includes banner slot)
4. **BRN-01** → **BRN-03** + **BRN-M01**
5. **PROF-01 / PROF-02** + **PROF-M01**
6. **SAD-01 / SAD-02** + modals
7. **EMP / LVH / ATT** (branch-scoped ops)
8. **SVC-01** → **SVC-04**
9. **APT-01** → **APT-03** + booking modals
10. **TXN**, **RPT**, **TKT**

Frame naming: `[ID] Screen Name` — e.g. `DASH-01 Dashboard Home`, `APT-M02 Cancel Booking Modal`.
Desktop frame size: **1440 × 1024** (enable vertical scrolling on main content).

Aligned to Admin-Functional-Spec.md v1.3 only. Add screens when functional spec is updated.
