UNISEX SALON & WELLNESS

Functional Specification

End Customer App — Discovery, Booking & Payments

Version 1.2 | **Date** June 30, 2026 | **Confidential**

© 2026 GlowTap

1. Executive Summary

The **GlowTap End Customer App** is the consumer-facing mobile experience for discovering nearby salons, browsing services, booking appointments with specialists, and paying online or at the salon. End users **self-register** via the app (Super Admin §4.8.3 — no manual creation by operations).

GlowTap follows an **Organization → Branch** model. Consumers discover and book at the **branch** level (physical location). Each branch belongs to a salon organization and exposes its own service catalog, operating hours, specialists, and availability.

Bookings created in the consumer app appear in the **Salon Admin portal** (Admin §4.12) for confirmation, fulfillment, cancellation, and refund handling. Payments flow as **B2C transactions** (Super Admin §4.5) with GlowTap commission applied per salon configuration.

2. User Roles & Access

Role	Description
End User (Customer)	Registered, authenticated consumer who discovers salons, books services, and pays via the app

Access principles:

- **Authentication required** — the app has no guest or unauthenticated mode. Every session must sign in or complete sign up + required verification before any app feature (discovery, search, booking, profile) is accessible.
- Unauthenticated users see only the **Welcome / Sign In / Sign Up** flow until a valid session is established.
- End users self-register; Super Admin can **disable** accounts for abuse or policy violations (Super Admin §4.8.3)
- Disabled users see a clear message on login attempt; active bookings remain visible read-only where policy allows
- When a salon org or branch is **Suspended** or **Terminated**, that branch is hidden from discovery and existing bookings show restricted actions per platform policy (Admin §5.6)
- One end-user account per verified email; phone uniqueness enforced at signup

> Login supports **Google Sign-In** and **email + password**. **Google:** email is trusted from OAuth — **phone OTP only** before the main app unlocks. **Email + password: email OTP and phone OTP** required before the main app unlocks.

3. Platform Navigation Overview

```
Authentication (required gate — no guest access)
├── Welcome / Sign In / Sign Up
├── OTP Verification (phone; email OTP for email signup only)
└── Forgot Password

Home (authenticated users only)
├── Nearby Salons              (default landing — map + list)
├── Search & Advanced Search   (name, city, state, filters)
├── Salon Detail               (branch profile, services, gallery)
├── Service Detail             (price, duration, specialists)
└── Booking Flow               (date → slot → specialist → review → pay)

Bookings
├── My Bookings List           (search, filters, status tabs)
├── Booking Detail             (actions by status)
├── Reschedule Flow            (re-select date, slot, specialist)
├── Cancel / Request Cancel
├── Feedback & Rating
├── Invoice Download
└── Raise Ticket (linked to booking)

Profile
├── View / Edit Profile
├── Saved Addresses / Location
├── Payment Methods (optional saved cards — future)
├── Notification Preferences
└── Help & Support

Notifications
└── In-app notification center (booking, payment, refund, promo)

Settings & Legal
├── Change Password
├── Terms of Service / Privacy Policy
├── App Version / Logout
└── Delete Account Request (future / compliance)
```

Primary navigation (bottom tab bar — recommended):

- **Home** — discovery and search
- **Bookings** — appointment history and active bookings
- **Notifications** — alerts and messages
- **Profile** — account and settings

4. Module Specifications

4.1 Authentication & Onboarding

4.1.1 Welcome / Sign In Screen

App entry gate. On launch, if the user has no valid session they remain on this screen (or Sign Up / OTP flows) — they **cannot** access Home, salon discovery, bookings, or any other module until authenticated and verified.

Entry screen for returning and new users.

Options:

- **Sign in with Google** — OAuth; if account exists and phone verified, log in to main app; if new or phone unverified, proceed to profile completion (§4.1.3) then **phone OTP only** (§4.1.4)
- **Sign in with Email** — email + password
- **Sign up** — navigate to registration (§4.1.2)
- **Forgot password** — email reset link flow (link expiry per platform policy)

Validation:

- Invalid credentials → generic error (do not reveal whether email exists)
- Disabled account → "Your account has been disabled. Contact support."
- Unverified phone on email login → user stays in verification flow; main app not accessible until required OTP complete (§4.1.4)

4.1.2 Sign Up Screen

Sign up with Google:

- OAuth consent → collect or confirm: full name, email (from Google — **treated as verified**; no email OTP)
- Collect phone number → proceed to **phone OTP only** (§4.1.4)

Sign up with Email (normal registration):

- Required fields: full name, email, phone, password (strength rules per platform config)
- Optional: profile photo, gender, date of birth (if salons use for personalization — optional v1)
- Accept Terms of Service and Privacy Policy (checkbox + links)
- Submit → **email OTP and phone OTP** (§4.1.4)

Rules:

- Email and phone must be unique across end users
- Password reset and Google-linked accounts: if email already registered with password, guide user to sign in or link account per policy

4.1.3 Profile Completion (Google / partial signup)

After OAuth or initial signup, user completes any missing required fields before OTP step:

- Phone number (required — always collected for Google signup if not already on file)
- Name confirmation
- Terms acceptance

> Google-provided email is stored as **verified** automatically; skip email OTP for this path.

4.1.4 OTP Verification

Verification rules by signup / sign-in path:

Path	Email OTP	Phone OTP	Unlock main app when
Google Sign-In / Sign-Up	**Not required** (email trusted via OAuth)	**Required**	Phone OTP verified
Email + password Sign-Up	**Required**	**Required**	Both OTPs verified
Email + password Sign-In	Required only if email not yet verified	Required only if phone not yet verified	All required verifications complete

Channel	When	Behavior
Email OTP	Email + password signup only; or when user **changes email** in profile	Send code to registered email; user enters code; resend with cooldown
Phone OTP	All signup paths; or when user **changes phone** in profile	Send SMS OTP; user enters code; resend with cooldown

- Verification status shown on profile (email ✓ auto for Google; phone ✓ after OTP)
- Change of **email** in profile → email OTP re-verification (applies to email/password accounts; Google users changing email follow same rule)
- Change of **phone** in profile → phone OTP re-verification

4.1.5 Post-Login Onboarding (first session)

Optional lightweight onboarding after verification:

- Request **location permission** — used for nearby salon discovery (§4.2)
- Brief value proposition carousel (skippable)
- Land on **Home — Nearby Salons**

4.1.6 Session & Security

- Logout from Profile / Settings
- Session timeout per platform configuration
- Optional **biometric unlock** (Face ID / fingerprint) for return visits — future enhancement

---

4.2 Home — Salon Discovery (Nearby)

Default landing for **authenticated, verified** users only. Surfaces **active branches** within configurable radius of the user's location.

4.2.1 Location Context

Source	Description
Device GPS	Primary — used when permission granted
Saved address	User-selected home/work or custom pin from Profile
Manual city selection	Fallback when GPS denied — user picks city/area for discovery

Display current search context: e.g., "Near Indiranagar, Bengaluru" with option to change.

4.2.2 Nearby Salons List & Map

Views:

- **List view** — scrollable cards
- **Map view** — pins for branches; tap pin → salon card preview

Salon card fields:

- Branch name, salon/org brand name (if different)
- Distance from user (km)
- Rating average and review count (from completed booking feedback)
- Starting price or "From ₹X" (lowest active service price)
- Top service tags (e.g., Haircut, Facial, Spa)
- Open/closed indicator based on branch operating hours (Admin §4.4)
- Thumbnail / cover image

Sort options:

- Distance (default)
- Rating (high to low)
- Price (low to high)

- Popularity (booking volume — platform metric)

4.2.3 Discovery Filters

Applied on nearby results and search results:

Filter	Description
Services / categories	Multi-select service types offered at branch
Price range	Min–max based on service catalog
Rating	Minimum star rating
Open now	Only branches currently within operating hours
Online payment available	Branches with at least one service allowing online pay
Gender preference	If branch/salon tags support unisex / men / women (optional v1)

Filters persist until cleared; active filter chips shown above results.

4.2.4 Search Radius Control

- Default radius from platform config (e.g., 5 km)
- User-adjustable slider or presets: **2 km · 5 km · 10 km · 15 km · 25 km**
- Increasing radius expands result set; empty state suggests increasing radius or changing location
- Radius applies to GPS/saved-address discovery only

4.2.5 Advanced Search (Other Locations)

For users searching outside current GPS radius or for a specific destination.

Search modes (combinable):

- **Salon / branch name** — typeahead as user types
- **City** — select or type city
- **State / region** — select state, then optionally narrow by city
- **Pin code / area** — optional precision

Behavior:

- Dynamic, flexible query — name-only, city-only, or combined (e.g., "Lakme Indiranagar Bengaluru")
- Results ranked by relevance, then distance if location known
- Same filters as §4.2.3 apply to search results
- Recent searches saved locally (clear history option)

4.2.6 Favorites / Saved Salons

- User can **save** a branch to favorites from list or salon detail
- **Favorites** section on Home or Profile for quick rebooking
- Removing favorite is instant

4.2.7 Promotional Banners (Consumer)

In-app banners configured by Super Admin (consumer audience — parallel to salon admin banners in Super Admin §4.9.2):

- Online payment discount promos ("Pay online & save 10%")
- Seasonal offers, new salon in area
- Tap banner → deep link to salon, service, or offer terms

4.3 Salon Detail (Branch Profile)

Opened when user selects a salon from discovery or search.

Displayed content:

- Branch name, address, map pin, distance
- Photo gallery
- Operating hours (today highlighted)
- Contact phone (tap to call — optional)
- Overall rating and review summary
- List of **active services** (Admin §4.10) with name, duration, price, thumbnail
- Specialists count or "X specialists available" (optional summary)
- Policies snippet: cancellation window, online vs pay-at-salon accepted

Actions:

- **Book** on a service → enters booking flow (§4.5)
- **Save to favorites**
- **Share salon** (deep link / share sheet)

Rules:

- Inactive or suspended branches not reachable via discovery; direct link shows unavailable message
- Services with `Offline payment allowed = No` still visible; booking requires online payment at checkout

---

4.4 Service Detail

Optional intermediate screen or expandable section before booking.

- Service name, description, photo, duration, price
- List of specialists who perform this service (names, photos, ratings if available)
- **Book Now** → booking flow with service pre-selected

4.5 Booking Flow

Multi-step flow; user can navigate back to change prior steps without losing context until payment.

4.5.1 Step 1 — Select Service

- If entered from salon detail, service pre-selected
- User confirms one service per booking (v1 — **one service per appointment**; multi-service cart future release)
- Show price, duration, payment mode flags (online allowed / pay at salon allowed)

4.5.2 Step 2 — Select Date

- Calendar view: selectable dates based on branch availability
- Dates with no operating hours, branch holidays, or no specialist availability shown disabled (Admin §4.8.2, §4.11)
- Minimum advance booking window and maximum future window per platform/salon config (e.g., book up to 30 days ahead)

4.5.3 Step 3 — Select Time Slot

- Slots generated per Admin §4.11 rules: branch hours, service duration, specialist availability, existing appointments
- Display available start times for selected date
- Unavailable slots hidden or shown disabled with reason where helpful ("Fully booked", "No specialist available")
- Slot reflects **service duration** (e.g., 45 min service blocks consecutive slot capacity)

© 2026 GlowTap

Confidential

4.5.4 Step 4 — Select Specialist

Option	Description
Choose specialist	List specialists available for selected date/time and service; show photo, name, designation, rating
Auto-assign specialist	System picks best available specialist (e.g., highest rating, least loaded, or round-robin — platform rule)

- If only one specialist qualified → auto-selected; user may still view profile
- If no specialist for slot → user returned to slot selection with message

4.5.5 Step 5 — Review & Pre-Invoice

Summary screen before payment — **pre-invoice / order review**:

Line item	Detail
Salon & branch	Name, address
Service	Name, duration
Specialist	Name or "Auto-assigned"
Date & time	Formatted local datetime
Service price	Base amount
Discounts	Online payment promo, salon offer, coupon (if applicable)
Taxes	GST/tax lines per platform config
Total payable	Final amount

Optional fields:

- Notes to salon (special requests — max length configurable)
- Apply promo code (if enabled)

Payment method selection:

Method	When available	Behavior
Pay online	Service/branch allows; gateway configured	Redirect to payment gateway; discount badges shown if online promo active
Pay at salon	Service `Offline payment allowed = Yes` (Admin §4.10)	No charge at booking; appointment confirmed as unpaid until salon marks paid

- If service requires online only → pay at salon hidden
- Online payment discounts (e.g., "Save ₹50 when you pay online") displayed prominently when configured by Super Admin / salon campaign

4.5.6 Step 6 — Payment (Online Path)

- Launch secure payment gateway (UPI, cards, wallets per integration)
- Success → create booking → confirmation (§4.5.7)
- Failure → remain on review screen with retry; slot held temporarily (hold TTL per platform config, e.g., 10 minutes)

4.5.7 Booking Confirmation

On successful booking (online paid or pay-at-salon selected):

- **Confirmation popup / full screen** with:
  - **Booking ID** (human-readable appointment reference)
  - Date, time, salon, service, specialist
  - Payment status: Paid / Pay at salon
  - Add to calendar (optional — device calendar export)
- Actions: **View booking**, **Book another**, **Back to home**
- Email/SMS/push confirmation sent (§4.10)

Initial appointment status:

- **Booked** — default when consumer completes booking (Admin §4.12)
- Salon may **Confirm** appointment (Admin §4.12.3) → status becomes **Salon Confirmed** (`Confirmed` in system)

4.6 My Bookings

Central module for appointment lifecycle management.

4.6.1 Bookings List

Views:

- **Upcoming** — Booked, Confirmed, In Progress
- **Past** — Completed, Cancelled, No-Show
- **All** — combined with filters

Search & filters:

Filter	Options
Status	Booked, Confirmed, In Progress, Completed, Cancelled, No-Show
Date range	Presets + custom
Salon / branch	Typeahead
Payment status	Paid, Unpaid, Refunded, Refund pending
Payment method	Online, Pay at salon

List card fields:

- Booking ID, date/time, salon name, service, status badge, amount, payment indicator

4.6.2 Booking Detail

Full view for a single appointment:

- Booking ID, status timeline (booked → confirmed → completed / cancelled)
- Salon, branch address (map link), service, specialist, date/time
- Payment breakdown, transaction ID (if online), invoice link
- Notes to salon
- Cancellation policy summary
- Action buttons based on status (§4.6.3–§4.6.8)

4.6.3 Appointment Status Reference

Aligned with Salon Admin (Admin §4.12.1):

Status	Consumer meaning	Typical next step
Booked	Appointment placed; awaiting salon confirmation (if confirmation step enabled)	Cancel, reschedule, request confirm
Confirmed	Salon acknowledged booking	Request cancel, reschedule
In Progress	Service underway at salon	View only
Completed	Service delivered	Feedback, invoice, raise ticket
Cancelled	Appointment cancelled	View refund status if applicable
No-Show	User did not attend	View record; may affect future booking policy

© 2026 GlowTap

Confidential

4.6.4 Cancel Booking

Current status	Consumer action	Refund / payment
Booked	**Cancel** directly — select reason (from master list) → confirm	If **paid online** → refund **initiated automatically** per platform rules; status visible in booking detail
Confirmed	**Request cancellation** — not instant; sent to salon for approval	On salon approval → cancelled; if paid online → refund initiated by salon/admin (Admin §4.12.4)
In Progress / Completed / Cancelled / No-Show	Cancel not available	—

- Cancellation reason codes from Super Admin master configuration
- User notified when cancellation request approved/rejected (Confirmed path)
- Cancelled slot freed for rebooking (Admin §4.12.4)

4.6.5 Reschedule Booking

Available when status is **Booked** or **Confirmed**:

1. User taps **Reschedule**
2. Re-enters flow: date → slot → specialist (same service; change service = cancel + new booking in v1)
3. Review updated summary
4. Confirm reschedule — prior slot released, new slot reserved
5. Notification to user and salon (Admin §4.12.3)

Rules:

- Reschedule cutoff: e.g., not within 2 hours of appointment (platform/salon configurable)
- If online paid, no additional charge if same price; price difference handling per platform rule (charge/refund delta — future or v1 simple: same service price only)

4.6.6 Feedback & Rating

Available after status **Completed**:

- Star rating (1–5) for overall experience
- Optional category ratings: service quality, specialist, cleanliness, value
- Text review (moderated optional — Super Admin policy)
- One feedback submission per completed booking; editable within 7 days (configurable)

Reviews contribute to salon/specialist aggregate ratings on discovery screens.

4.6.7 Invoice Download

- Available for **Completed** bookings (and **Cancelled** with payment/refund record where invoice policy applies)

- **Download PDF** from booking detail
- Invoice includes: booking ID, salon GST details (if configured), service, amount, tax, payment method, transaction ref, date

4.6.8 Raise Ticket (Booking-Linked)

From booking detail, user raises support ticket:

- Reason & sub-reason (Super Admin master list — consumer-facing subset)
- Description, photo attachments (e.g., service issue)
- Booking auto-linked
- Ticket status: Open, In Progress, Resolved, Closed
- User views replies in app; notified on update (Super Admin §4.11 parallel for consumer tickets)

4.7 Profile & Account

4.7.1 View Profile

- Full name, email, phone (masked partially), profile photo
- Verification badges on profile: email ✓ (auto for Google OAuth; OTP for email signup), phone ✓ (OTP)
- Member since date
- Booking count summary (optional)

4.7.2 Edit Profile

- Editable: name, profile photo
- Email / phone change → triggers OTP re-verification for the changed field (email OTP skipped if account uses Google OAuth and email unchanged)
- Save with validation

4.7.3 Saved Locations

- Home, work, or custom labels with address/map pin
- Used as discovery context alternative to GPS
- Add, edit, delete

4.7.4 Notification Preferences

Toggle channels per event type:

Event	Push	Email	SMS
Booking confirmation	✓	✓	✓
Reminder (24h / 2h before)	✓	✓	✓
Status change (confirmed, cancelled)	✓	✓	✓
Refund processed	✓	✓	✓
Promotional offers	✓	✓	opt-in

4.7.5 Change Password

- For email/password accounts only
- Current password + new password + confirm
- Google-only accounts: optional "set password" for backup login

4.7.6 Account Disabled / Delete

- Disabled accounts handled at login (§4.1.1)
- **Delete account request** — submit request for data deletion (GDPR-style); Super Admin processes (recommended future / compliance)

4.8 Help & Support (General)

Accessible from Profile without a booking context.

- Browse FAQ (from Super Admin CMS §4.9.1 — consumer FAQ section)
- **Contact support** — create ticket (reason, description, attachments)
- View **My tickets** — list and detail with status
- Platform support hours and expected response SLA (display only)

4.9 Notifications Center

In-app notification feed (bell icon / tab):

- Booking confirmations, reminders, status updates
- Cancellation approved/rejected
- Refund completed
- Promotional messages (if opted in)
- Tap notification → deep link to booking or relevant screen

- Mark as read; clear all

4.10 Notifications (Outbound)

Triggered events (minimum v1):

Event	Recipient	Channels
Signup / verification OTP	End user	Email (email signup only) / SMS
Booking confirmed (created)	End user	Push, email, SMS
Salon confirmed appointment	End user	Push, email
Reminder 24h / 2h before	End user	Push, SMS
Rescheduled	End user	Push, email
Cancelled (by user or salon)	End user	Push, email, SMS
Refund initiated / completed	End user	Push, email
Cancellation request rejected	End user	Push, email
Ticket reply	End user	Push, email

Templates and enablement configured in Super Admin Master Configuration.

5. Business Rules & Edge Cases

5.1 Discovery & Eligibility

- **Authentication required** — no salon list, search, map, or branch detail without a signed-in session and completed verification (phone OTP minimum; email OTP additionally for email + password signup)
- Only **Active** branches with **Active** org status appear in discovery
- Suspended/terminated orgs: branches hidden; existing bookings show limited actions with explanatory message
- **Google sign-up / sign-in:** phone OTP required; email OTP **not** required
- **Email + password sign-up:** email OTP and phone OTP required
- User must hold a valid session with required verifications complete before any in-app feature is available

5.2 Availability & Slots

- Slots follow Admin §4.11: operating hours, service duration, specialist weekly off, leave, branch holidays, existing appointments
- **No Specialist Available** slots are not bookable
- Auto-assign uses platform algorithm; user sees assigned specialist name on confirmation

5.3 Payments

- **Pay online:** B2C transaction recorded (Super Admin §4.5); GlowTap commission applied per salon rate
- **Pay at salon:** Booking created with unpaid status; salon collects offline; transaction may be recorded by salon/admin separately per future scope
- Online payment promos apply only when user selects pay online and payment succeeds
- Failed payment does not create booking

5.4 Cancellations & Refunds

Scenario	Behavior
User cancels while **Booked**	Immediate cancel; online refund auto-initiated
User requests cancel while **Confirmed**	Pending salon approval; user notified of outcome
Salon/admin cancels	User notified; online refund initiated by salon side (Admin §4.12.4)
Refund status	Visible on booking: Initiated → Processing → Completed / Failed

Refund timing subject to payment gateway; commission reversal per Super Admin rules.

5.5 Reschedule & No-Show

- Reschedule allowed only for Booked and Confirmed within policy window
- **No-Show** set by salon admin — user cannot dispute in-app beyond raising ticket
- Repeated no-shows may trigger booking restrictions (platform policy — future)

5.6 Reviews

- Only completed bookings eligible
- Salons cannot edit consumer reviews; Super Admin may moderate/remove policy violations

5.7 Account & Abuse

- Super Admin disable immediately blocks new bookings and login
- Rate limits on OTP requests and failed login attempts

© 2026 GlowTap

Confidential

6. Integration Summary (Cross-Portal)

Capability	Consumer app	Salon Admin	Super Admin
Self-registration	Yes	No (created on approval)	View/disable only
Service catalog	Read	Create/edit	—
Slot availability	Read (book)	Configure + preview	—
Appointments	Create, cancel, reschedule	Confirm, cancel, complete	View via transactions
B2C payment	Pay online	View transactions	Commission + reports
Support tickets	Raise (booking/general)	Raise to platform	Manage all
Promotional banners	Consumer audience	Salon admin audience	Configure
Reviews	Submit	View (read-only)	Moderate (future)

7. Out of Scope (v1.0)

- Multi-service cart / single checkout for multiple services
- In-app chat with salon (ticket-based support only)
- Loyalty points / wallet balance
- Gift cards
- Product retail purchase (services only)
- Staff-facing mobile app
- Walk-in booking creation by consumer without slot
- Video consultation bookings

8. Glossary

Term	Definition
End User / Customer	Consumer using the GlowTap app to book salon services
Branch	Physical salon location; primary bookable entity
Org / Organization	Salon business owning one or more branches
Booking / Appointment	Scheduled service reservation with date, time, specialist
Booked	Initial status after consumer completes booking flow
Confirmed	Salon acknowledged the appointment (Salon Confirmed)
Specialist	Employee tagged to perform specific services (Admin §4.10)
Slot	Bookable time window from availability engine (Admin §4.11)
B2C Transaction	End-user payment to salon for a booking
Pre-invoice	Order review screen showing line items before payment
Pay at salon	Offline payment option at time of visit — no online charge at booking

9. Document Control

Version	Date	Author	Changes
1.2	June 30, 2026	GlowTap Product Team	Google sign-in/sign-up skips email OTP; phone OTP still required
1.1	June 30, 2026	GlowTap Product Team	Removed guest/unauthenticated access; auth required for all app features
1.0	June 30, 2026	GlowTap Product Team	Initial End Customer app functional specification

This document describes the intended behavior of the GlowTap End Customer App. Technical implementation details will be covered in the companion Customer Solutioning Document.
